

e-POWER and e-ROC AUCTION RESULTS

e-POWER Update

The next e-POWER auction is on 27th January 2015. Currently 96 generating sites amounting to some 412 MW of power are registered to take part in the auction. All technologies are represented with a noticeable increase in PV and AD assets. Most of the sites are being auctioned for the Summer 15 period, 1st April to 30th September.

There is still time to register your site for the auction.

Over 70k ROCs auctioned

The scheduled e-ROC monthly auction took place on Monday 22nd December 2014 and 70,417 ROCs were sold, an increase of 20% from the November auction and almost 10% up on December last year. Approximately 36,000 ROCs were left unsold having not met their reserve price.

The average price was £42.66 up 19p from last month. Bidding activity was almost double that of last month at 358 bids perhaps reflective of recent forecasts of higher ROC prices due to lower estimates for PV and wind ROC issue for CP13.

The dates of the upcoming e-ROC auctions are:

Monday 26th January 2015
Wednesday 25th February 2015
Wednesday 25th March 2015
Thursday 23rd April 2015
Friday 22nd May 2015
Wednesday 24th June 2015
